

**CIRCULAR FOR NURSERY TO XII
TRANSPORT SECURITY**

APS/CIRNO/2/P/30/18-19

August, 2018

Dear Parents

We have attached great importance to enhance the Safety and Security measures for children travelling not only in our own School Buses but also private vans. I would like to bring to your notice some of the measures taken by the school in this regard:

- The school has done a physical check on all the private vans which ferry students to and from school, and we have maintained a detailed record of all the vehicles along with their Registration Certificate, Driver's Badge and Licence.
- There was a major crack down on overloaded vans and this has resulted in increasing the number of vans substantially. Now none of the vans are ferrying students more than the permissible limits of the same.
- Every van has a teacher in-charge, who is responsible to take attendance before the students are handed over to the designated van driver. This ensures that no child is left behind.
- Members of the School transport department make surprise checks to ensure that the van drivers are following all safety norms like:
 - Escorting the children across the road.
 - Boarding and de boarding children from the left door of the van.
 - Dropping the nursery and KG children in an orderly manner, at the assigned gate.
- Any misconduct in the van is viewed very seriously and action is taken immediately.

We have taken appropriate measures to ensure students' safety in the vans; however, we will recommend you to send your ward to school in the school bus, which is a safer mode of transport viz a viz private vans. In case you want to avail of the school bus facility, you are requested to contact the school office to check for any vacancy in the bus route of your area.

We always look forward to your continued support and cooperation.
